kcole@woodardcurran.com

Proposed Project and Responsible Agency Information

Project Title: Click here to enter text.

Project Location: Click here to enter text.

Submitting Entity / Project Proponent: Click here to enter text.

Other Participating Agencies (if applicable): Click here to enter text.

Contact Name for Project Proponent: Click here to enter text.

Mailing Address for Project Proponent: Click here to enter text.

Phone Number for Project Proponent: Click here to enter text.

Email Address for Project Proponent: Click here to enter text.

To the best of your knowledge, do you anticipate that your agency will adopt/approve the 2018 MAC IRWMP?

☐ Yes
☐ No
Eligibility

In order to be considered for inclusion in the MAC Plan 2018 Update, the project must meet at least one MAC Plan Goal, at least one Statewide Priority, and address at least two Resource Management Strategies. If your project does not meet these minimum requirements it will not be included in the MAC Plan 2018 Update.

MAC Plan Update Goals

1) Does your project advance one or more of the MAC IRWM goals?

☐ Yes

☐ No (if No, the project is ineligible)

If yes, please indicate which goal and explain how.

Policy 1: Maintain and Improve Water Quality

☐ Goal: Reduce sources of contaminants.
  Description: Click here to enter text.

☐ Goal: Manage stormwater flows and transport of sediment and contaminants.
  Description: Click here to enter text.

Policy 2: Improve Water Supply Reliability and Ensure Long-Term Balance of Supply and Demand

☐ Goal: Ensure sufficient firm yield water supply.
  Description: Click here to enter text.

☐ Goal: Maintain and improve water infrastructure reliability.
  Description: Click here to enter text.

☐ Goal: Promote water conservation, recycling and reuse for urban and agricultural uses.
  Description: Click here to enter text.

☐ Goal: Develop appropriate drought mitigation measures.
  Description: Click here to enter text.

Policy 3: Practice Resource Stewardship

☐ Goal: Identify opportunities to conserve, enhance and restore the region’s natural resources.
Goal: Minimize adverse effects on biological and cultural resources.

Goal: Identify opportunities for public access, open spaces, trails, and other recreational benefits.

Policy 4 is not included here because it is more relevant to the MAC Plan than to individual projects.

Policy 5 is incorporated in Questions 10 and 11 below.

Statewide Priorities

2) Does your project advance one or more of the Statewide Priorities?

☐ Yes

☐ No (if No, the project is ineligible)

If yes, please indicate which priorities. Check all that apply. More information on each priority is included on the last two pages of this form.

Please check all that apply.

☐ Make Conservation a California Way of Life

☐ Increase Regional Self-Reliance and Integrated Water Management Across All Levels of Government

☐ Achieve Co-Equal Goals for the Delta

☐ Protect and Restore Important Ecosystems

☐ Manage and Prepare for Dry Periods

☐ Expand Water Storage Capacity and Improve Groundwater Management

☐ Provide Safe Water for All Communities

☐ Increase Flood Protection

☐ Increase Operational and Regulatory Efficiency
### Identify Sustainable and Integrated Financing Opportunities

#### Resource Management Strategies

3) **Does your project address two or more of the Resource Management Strategies?**

- [ ] Yes
- [ ] No (if No, the project is ineligible)

**If yes, please indicate which strategies. Check all that apply to your project.** *Please select all that apply to your project.*

- [ ] Agricultural Water Use Efficiency
- [ ] Urban Water Use Efficiency
- [ ] Flood Management
- [ ] Conveyance – Delta
- [ ] Conveyance – Regional/local
- [ ] System Reoperation
- [ ] Water Transfers
- [ ] Conjunctive Management & Groundwater Storage
- [ ] Desalination – Brackish and Sea Water
- [ ] Recycled Municipal Water
- [ ] Precipitation Enhancement
- [ ] Surface Storage – CALFED
- [ ] Surface Storage – Regional/local
- [ ] Drinking Water Treatment and Distribution
- [ ] Groundwater and Aquifer Remediation
- [ ] Matching Water Quality to Use
- [ ] Pollution Prevention
- [ ] Salt and Salinity Management
- [ ] Urban Stormwater Runoff Management
- [ ] Agricultural Lands Stewardship
- [ ] Ecosystem Restoration
- [ ] Forest Management
- [ ] Land Use Planning and Management
- [ ] Recharge Area Protection
- [ ] Sediment Management
- [ ] Watershed Management
- [ ] Economic Incentives
- [ ] Outreach and Engagement
- [ ] Water and Culture
- [ ] Water-Dependent Recreation
- [ ] Other Strategies (Crop Idling for Water Transfers, Dewvaporation or Atmospheric Pressure Desalination, Fog Collection, Irrigated Land Retirement, Rainfed Agriculture, Snow Fences, Waterbag Transport/Storage Technology)
Responsible Agency Information

Contact Name: -

Affiliation: -

Address: -

Phone: -

Email: -

Other Participating Agencies (if applicable): -

Project Description

Please provide a description of your project, including the project location (please provide GPS coordinates if available), area and/or entities that will be affected by or will benefit from your project, related water and environmental resources within the project boundaries, and any potential obstacles to implementation. Attach extra pages if necessary. If feasible, please attach a copy of all relevant project literature.

Click here to enter text.

Project Status: Choose from Dropdown Menu

Readiness to Proceed

Please indicate your project’s readiness. In the text box, please provide more information on timing, such as when design may be complete, when permits/environmental documentation may be acquired, or when construction may begin.

- discuss project readiness and anticipated start date. Include a description of the status of design and environmental documentation (if applicable), and securing required matching funds.

☐ Planning/Initial Study

☐ Conceptual Design

☐ In Design

☐ Design Complete

☐ In Environmental Review

☐ Environmental Review Complete

Click here to enter text.
4) Planning Horizon

Is the project expected to be completed by 2027?

☐ Yes
☐ No

5) Technical Feasibility

Please list background information, studies, or other documentation (including author and year) that detail the technical feasibility of the project.

Click here to enter text.

8) Economic Feasibility and Project Costs

Please provide estimated project costs (capital, operations and maintenance, and replacement) and estimated project life.

Capital Cost: $ Click here to enter text.

Annual O&M Costs: $ Click here to enter text.

Replacement Costs, Description of Equipment to be Replaced, & Frequency of Replacement (e.g., every 5 years): Click here to enter text.

Estimated Project Life (Years): Click here to enter text.

Cost Basis (if not 2018 dollars): Click here to enter text.

What is the basis for your project costs? At what stage in the project were they developed? If a cost estimate has been prepared, please provide.

Click here to enter text.

Please describe the economic feasibility of the project. If an economic analysis (benefit/cost analysis or cost-effectiveness analysis) of the project has been completed, please provide the findings of that analysis and the reference (including author and year).

Click here to enter text.

6) Environmental Documentation

Describe the environmental documentation required (e.g., Environmental Impact Report or Negative Declaration) for the proposed project and the status of the required documentation. If environmental documentation is required but has not been started, please provide the estimated timeframe for completing the required documentation.

9) Financing

How will your project be financed? What are the funding sources for your project?
10) Climate Change Adaptation

Does your project help adapt to climate change? E.g., how your project helps the region adapt to identified climate change regional vulnerabilities; how your project may address changes to the amount, intensity, timing, quality, and variability of runoff and recharge.

☐ Yes

☐ No

If yes, please explain how and the likelihood of the climate change adaptation benefits.

Click here to enter text.

11) Climate Change Mitigation

Does your project help mitigate against the effects of climate change? E.g., how your project may reduce greenhouse gas (GHG) emissions as compared to project alternatives; how your project may reduce energy consumption, especially the energy embedded in water use; or if your project includes renewable energy sources.

☐ Yes

☐ No

If yes, please explain how and the likelihood of the climate change mitigation benefits.

Click here to enter text. Click here to enter text.

More Information

7)12) Multi-entity Integration and Benefits

Is your project linked to or combined with another project or provide benefits to more than one entity?

☐ Yes

☐ No

If yes, please describe the linked / integrated projects and other possible project participants. Describe entities that benefit from the project and describe the benefits to each entity.

Click here to enter text.

Possible Funding Sources:
Please describe the economic feasibility of the project. If an economic analysis (benefit/cost analysis or cost-effectiveness analysis) of the project has been completed, please provide the findings of that analysis and the reference (including author and year). If an economic analysis has not been completed for the project, please provide a detailed description of expected project benefits, including benefits to water supply, water quality, and natural resources, using numeric values when possible (e.g., acres of habitat restored, acre-feet per year of water supply generated, etc). Suggested metrics are provided below.

Summary of Economic Analysis Report (including title, author, and year):

Water Supply-Avoided Costs
- Avoided Pumping / Conveyance Costs:
- Avoided Water-Treatment Costs:
- Avoided Wastewater Treatment Costs:
- Avoided Costs of New Supplies:
- Other:

Water Quality-Avoided Costs
- Avoided Water Treatment Costs:
- Avoided Wastewater Treatment Costs:
- Other:

Benefits

Quantifiable Benefits

Please provide the quantifiable benefits for Water Supply, Water Quality, and Resource Stewardship, as appropriate.

Water Supply Benefits
- Acre-feet Per Year of New Supply:
- Acre-feet Per Year of Reduced Demand:

Water Quality Benefits
- Reduction in pollutant loading:
- Reduction in pollutant transport:

Resource Stewardship Benefits
Acres of Habitat Created, Restored, or Enhanced:
Increase in new or enhanced recreation/public access opportunities (e.g., miles of trail):
Reduction in flood-related damages:
Reduction in greenhouse gas emissions:
8) Other:
9) —
13) Disadvantaged Communities Benefits / Environmental Justice

Does your project provide specific benefits to critical DAC water issues? For the purposes of Proposition 1 funding, a DAC is defined as “a community with a median household income (MHI) less than 80% of the Statewide average.” If you are unsure if your project is located in a DAC, please use the DWR mapping tool, located here: https://gis.water.ca.gov/app/dacs/.

☐ Yes
☐ No

If yes, please identify the benefits and explain the magnitude of each benefit.

Please describe how the project will benefit or impact disadvantaged communities or environmental justice goals.

Click here to enter text.

14) Native American Tribal Communities Benefits

Does your project provide specific benefits to critical water issues for Native American tribal communities?

☐ Yes
☐ No

If yes, please identify the benefits and explain the magnitude of each benefit.

Click here to enter text. Native American Tribal Communities

Please describe how the project will benefit or impact Native American tribal communities.

15) Environmental Justice Concerns
Does your project have environmental justice concerns? Environmental Justice is defined by State Law as: “the fair treatment and meaningful involvement of all people regardless of race, color, sex national origin, or income with respect to the development, implementation and enforcement of environmental laws, regulations, and policies.”

☐ Yes
☐ No

Please provide a rationale for your response.

Click here to enter text.

10) Climate Change Adaptation or Mitigation

Please discuss how your project contributes to climate change adaptation and/or mitigation of greenhouse gas emissions. Please discuss potential climate change-related impacts of the project (e.g., increased greenhouse gas emissions). Also discuss the likeliness of these climate change benefits and/or impacts.

Cultural Resources

11) Please describe how the project minimizes adverse effects on cultural resources.

12)–

13)–

14) Ecosystem Function

15) Please describe how the project maintains or improves ecosystem function.

16)–

17) Additional Criteria

18)–

19)16) Best Project for Intended Purpose

Please indicate the score below that best reflects your project and provide a justification of how you arrived at your score.

☐ High: Project is the best possible alternative to meet the stated need from a social, environmental, and economic perspective.

☐ Medium: Other alternatives exist that may be preferable from a social, environmental, and economic perspective.

☐ Low: Other alternatives clearly exist that will be better to meet the intended need from a social, environmental, and economic perspective.

Click here to enter text.

20)17) Minimize Implementation Risk
Please indicate the score below that best reflects your project and provide a justification of how you arrived at your score.

☐ High: Minimal implementation risk due to documented institutional barriers such as regulatory, environmental, or permitting obstacles, and low degree of controversy, potential legal challenge, or potential partners’ uncertainty.

☐ Medium: Moderate implementation risk due to documented institutional barriers such as regulatory, environmental, or permitting obstacles, and moderate degree of controversy, potential legal challenge, or potential partners’ uncertainty.

☐ Low: High implementation risk due to documented institutional barriers such as regulatory, environmental, or permitting obstacles, and high degree of controversy, potential legal challenge, or potential partners’ uncertainty.

Click here to enter text.
California Statewide Priorities

Make Conservation a Way of Life
- Building on current water conservation efforts and promoting the innovation of new systems for increased water conservation.
- Expand agricultural and urban water conservation and efficiency to exceed SBX7-7 targets
- Provide funding for conservation and efficiency
- Increase water sector energy efficiency and greenhouse gas reduction capacity
- Promote local urban conservation ordinances and programs

Increase Regional Self-Reliance and Integrated Water Management Across All Levels of Government
- Ensure water security at the local level, where individual government efforts integrate into one combined regional commitment where the sum becomes greater than any single piece.
- Support and expand funding for Integrated Water Management planning and projects
- Improve land use and water alignment
- Provide assistance to disadvantaged communities
- Encourage State focus on projects with multiple benefits
- Increase the use of recycled water

Achieve Co-Equal Goals for the Delta
- This action is directed towards State and federal agencies; however, consideration will be afforded to eligible local or regional projects that also support achieving the co-equal goals providing a more reliable water supply for California and to protect, restore, and enhance the Delta ecosystem.

Protect and Restore Important Ecosystems
- Continue protecting and restoring the resiliency of our ecosystems to support fish and wildlife populations, improve water quality, and restore natural system functions.
- Restore key mountain meadow habitat
- Manage headwaters for multiple benefits
- Protect key habitat of the Salton Sea through local partnership
- Restore coastal watersheds
- Continue restoration efforts in the Lake Tahoe Basin
- Continue restoration efforts in the Klamath Basin
- Water for wetlands and waterfowl
- Eliminate barriers to fish migration
- Assess fish passage at large dams
- Enhance water flows in stream systems statewide

Manage and Prepare for Dry Periods
- Effectively manage water resources through all hydrologic conditions to reduce impacts of shortages and lessen costs of state response actions. Secure more reliable water supplies and consequently improve drought preparedness and make California’s water system more resilient.
• Revise operations to respond to extreme conditions
• Encourage healthy soils

Expand Water Storage Capacity and Improve Groundwater Management
• Increase water storage for widespread public and environmental benefits, especially in increasingly dry years and better manage our groundwater to reduce overdraft.
• Provide essential data to enable Sustainable Groundwater Management
• Support funding partnerships for storage projects
• Improve Sustainable Groundwater Management
• Support distributed groundwater storage
• Increase statewide groundwater recharge
• Accelerate clean-up of contaminated groundwater and prevent future contamination

Provide Safe Water for All Communities
• Provide all Californians the right to safe, clean, affordable and accessible water adequate for human consumption, cooking, and sanitary purposes.
• Consolidate water quality programs
• Provide funding assistance for vulnerable communities
• Manage the supply status of community water systems
  o Additionally, as required by Water Code §10545, in areas that have nitrate, arsenic, perchlorate, or hexavalent chromium contamination, consideration will be given to grant proposals that included projects that help address the impacts caused by nitrate, arsenic, perchlorate, or hexavalent chromium contamination, including projects that provide safe drinking water to small disadvantaged communities.

Increase Flood Protection
• Collaboratively plan for integrated flood and water management systems, and implement flood projects that protect public safety, increase water supply reliability, conserve farmlands, and restore ecosystems.
• Improve access to emergency funds
• Better coordinate flood response operations
• Prioritize funding to reduce flood risk and improve flood response
• Encourage flood projects that plan for climate change and achieve multiple benefits

Increase Operational and Regulatory Efficiency
• This action is directed towards State and federal agencies; however, consideration will be afforded to eligible local or regional projects that also support increased operational of the State Water Project or Central Valley Project.

Identify Sustainable and Integrated Financing Opportunities
• This action is directed towards State agencies and the legislature.
